DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see p.13, filed 06/07/07, with respect to rejection of claims 1,2,4-12,15,16,18,21,22,24-31 and 33-44 have been fully considered and are persuasive. The rejection of the claims has been withdrawn.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 30,31 and 33-40 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 30 recites "A machine-readable medium having code stored thereon which defines an integrated circuit (IC)...". The original disclosure supports only a statutory/hardware system/method with only a brief mention that such hardware system/method can be or may be performed/substituted by various combinations of software and hardware without any adequate and enabling disclosure, therefore, claims 30,31 and 33-40 refer to such inadequately supported options.

Claim Objections

3. Claims 14 and 18 are objected to because of the following informalities:

Claims 14 and 18 depend on a canceled claim. Appropriate correction is required.

Allowable Subject Matter

4. Claims 1,2,4-12,15,16,19-22,24-29 and 45 are allowed.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
